F36673ET

SPECIFICATIONS

- **Cabinet**
  Ebony Texture finish.
  Dimensions: 30⅞" H, 33⅜" W, 24⅜" D.
  Approx. Shipping Weight: 190 Lbs.
- **Optional Universal Bush[1] Base VS64935**
  Ready-to-assemble coordinated base provides storage for VCR or other equipment.
  Dimensions: 19⅛" H, 38¹⁵⁄₁₆" W, 23⅜" D.
  Approx. Shipping Weight: 71 Lbs.

REMOTE

- **Master Touch® Universal Remote CRK74A {43-Button}**
  Ergonomic design and color-coded buttons provide complete TV operation plus primary function control of virtually every brand of remote-controllable VCR and cable box. This remote will allow control of the RCA brand DSS® system.

PICTURE

- **Optimum Contrast Screen**
  Dark glass picture tube and the 110° {Very High Performance} VHP system combine to deliver outstanding picture contrast: blacker blacks, brilliant whites and deep rich colors—even in bright room light conditions. The VHP system also reduces cabinet depth while optimizing focus, convergence and picture geometry to deliver brighter highlights and improved resolution.
- **Comb Filter**
  Separates black and white detail from color information to virtually eliminate edge crawls and rainbow effects while extending resolution.
- **ColorTrak® Chassis System**
  Automatic picture controls deliver a superb picture which seldom needs adjustment.
  - **–Auto Color Control**
    Automatically maintains natural flesh tones and color fidelity from channel to channel and scene to scene.
  - **–Contrast/Color Tracking System**
    Synchronizes contrast and color settings to maintain vibrant images.
  - **–BlackLock Contrast Circuit**
    Extends black levels in bright scenes to enhance contrast and detail.
  - **–Dynamic Black Level Expansion**
    Maintains black levels to prevent "washed-out" images.
  - **–Picture Reset**
    Instantly returns picture to factory settings for Color, Tint, Contrast, Brightness and Sharpness.
  - **–Non-Volatile Memory**
    In case of most power outages, the picture adjustments and channel selections are stored in electronic memory.
  - **–LSI Chassis Technology**
    Advanced Large Scale Integrated {LSI} circuit design reduces the number of components for greater reliability and signal efficiency.
- **181-Channel Tuning Capability[2]**
  Digitally controlled frequency synthesis tuning system "locks on" to cable and standard signals with unsurpassed accuracy.
- **Advanced Autoprogramming**
  Auto Cable/Air Switch sets tuner to cable or "off-air" frequencies during initial setup. Then system automatically scans for and locks active channels into channel memory.

SOUND

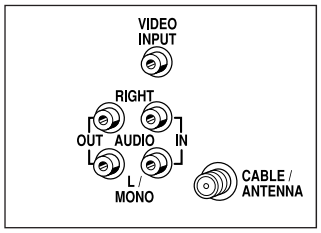
- **Broadcast Stereo with dbx[3] Noise Reduction**
  Improves the clarity and fidelity of stereo broadcasts by restoring dynamic range and suppressing unwanted noise.
- **Second Audio Program {SAP}**
  Decodes the alternate second audio program available on some broadcasts without add-on decoders or sound systems.
- **Front-Fired Speaker System**
  Front-fired full range frequency drivers provide excellent imaging while localizing voices at the screen.

CONVENIENCE

- **Color Picture-In-Picture[4]**
  Watch two programs at the same time—both in color. Remote-controlled operation includes Picture-In-Picture On/Off, Continuous Move and Swap.
- **Multi-Language On-Screen Display**
  Allows the on-screen menu system to be displayed in one of three languages {English, French or Spanish}.
- **Channel Labeling**
  Assign on-screen characters to easily identify channels {e.g., NBC, HBO, ESPN, VH-1}.
- **Commercial Skip**
  Countdown timer returns TV to original channel, so other channels can be browsed during program breaks.
- **Programmable Timer System**
  Convenient scheduling system can be used in a variety of ways:
  - **–Sleep Timer**
    Automatically turns the TV off after a preset time period— for those times when you drift off to sleep in front of the television.
  - **–Alarm Timer**
    Wake up to your favorite morning show or turn on your television automatically to catch your favorite program.
  - **–Scheduling Timer**
    Since the alarm setting remains in the TV memory indefinitely, the TV can be scheduled to turn on at the same time every day.
- **On-Screen Time and Channel Display**
  Displays time and channel number during channel change or at the press of a button.
- **On-Screen Menu System**
  On-screen displays visually guide you through adjustments of all TV picture adjustments and features—all with remote control convenience.
- **CaptionVision CC Closed Caption Capability[5]**
  Assists the hearing impaired, helps children learn to read, and aids in the teaching of English as a second language. Built-in Closed Caption Decoder displays the audio portion of a program as text on the TV screen {when program is aired with the encoded signal}.

CONNECTIONS

- **5-Jack Audio/Video Monitor Panel**
  Provides direct audio and video connections for a VCR or any stereo video source. Variable audio outputs maintain remote volume and mute control when connected to an external amplifier.



- **S-Video Input**
  Direct Y/C input connects TV to compatible S-Video sources {i.e., RCA DVD player, RCA brand DSS® receiver, S-VHS, Hi8 and laserdisc player} for high-resolution playback. Independent processing of the color and black-and-white portions of the video signal allow for reproduction of up to 440 lines of horizontal resolution {based on EIA measurement criteria}, depending on the input source.
